

What is a solar power purchase agreement (solar PPA)?

A solar power purchase agreement (solar PPA) is an arrangement where you contract with a solar developer who pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels, and it could include an energy storage system.

What is a power purchase agreement (PPA)?

Power Purchase Agreements (PPAs), which enable purchasing renewable energy from large, off-site projects, have developed significantly in corporate renewable energy options. A PPA is a contract between a power producer and a power purchaser. The producer agrees to sell electricity to the purchaser at a fixed price for a specified period of time.

What is a solar PPA?

A solar PPA, or Solar Power Purchase Agreement, is a financing mechanism commonly used to fund larger renewable energy projects.

What is an off-site power purchase agreement (PPA)?

An off-site power purchase agreement (PPA) is an agreement that enables businesses to access renewable energy from external projects located off their premises. These projects can include large-scale solar or wind farms developed by renewable energy companies or utility providers.

Who pays for the solar system in a solar PPA?

With a solar power purchase agreement (solar PPA), you contract with a solar developer that pays for, installs, and maintains a solar system on your property. The system could include ground-mounted, rooftop, or carport solar panels (or any combination thereof), and it could include an energy storage system.

Why are solar power purchase agreements gaining popularity?

Solar power purchase agreements (PPAs) are gaining popularity because they remove the biggest barrier to entry - the price tag of solar. They can be structured with minimal upfront capital costs to the business owner.
