

What is a solar power plant (PPC)?

In short, a PPC aggregates all of the solar farm's components, meteorological sensors, inverters, trackers, and substation systems to create a 'power plant' from the standpoint of the transmission system operator.

What is a power plant Controller (PPC)?

A power plant controller (PPC) is an automation platform designed to manage and optimize the operation of a solar farm. PPCs utilize advanced control software to efficiently operate the plant and maintain grid stability while adhering to regulatory requirements.

Why should you choose PPC solar?

PPC Solar works closely with customers to develop the right off-grid solution. With our roots starting in off-grid solar we are well aware of the customization required. There are differences in the quality of equipment you can purchase that can have an effect on your electrical usage capabilities.
