

Did Pulse Power offer a solar buyback plan?

Pulse Power used to offer the most popular solar buyback plan around. They had a "bundled" energy rate of power and delivery, and they purchased solar power back at the same rate, including delivery.

Is Pulse Power Solar Buyback available in Texas?

Unfortunately, Pulse Power Solar Buyback is no longer available in Texas. Oncor, the delivery company in North Texas and parts of Central and West Texas, no longer offers net metering programs as they are not a retail electricity provider.

Why are solar buyback plans so popular?

Solar buyback plans are popular because they are cost-effective and energy efficient. So, opting for one will help generate clean energy and allow you to get credit for the excess energy produced. Different companies are providing these plans to their customers with interesting offers.

What is a Texas solar buyback plan?

A Texas solar buyback plan, also known as Texas Net Metering, is a program that pays you for the excess solar power you generate from the solar panels on your roof. The electric company credits your account for the power your panels produce.

Do uncapped solar buyback plans save money?

Uncapped solar buyback plans will save the most money for solar homeowners in Texas. These plans have no limit on how much excess solar power the company will credit you for. During certain months, your solar panels may produce more electricity than your home uses.

How does solar buyback work?

They offer solar buyback plus and solar buyback select plans, both for a duration of 12 months. There is no credit sweep and the electricity is 100% renewable. The customer gets solar buyback credits at a lower export rate compared to the energy rate.
