

What is Quaid-e-Azam Solar Power Park?

Entrance to Quaid-e-Azam Solar Power Park - Photo courtesy Zofeen T. Ebrahim. Some 400,000 solar panels, spread over 200 hectares of flat desert, glare defiantly at the sun at what is known as the Quaid-e-Azam Solar Power Park (QASP) in Cholistan Desert, Punjab, named after Pakistan's founding father, Mohammad Ali Jinnah.

How many solar panels will QASP produce in 2017?

Once completed in 2017, the site could have capacity of 5.2 million PV cells producing as much as 1,000 MW of electricity - enough to power about 320,000 households. Construction of the next stage is already underway, led by another Chinese company Zonergy. One of the main access roads inside QASP - Photo courtesy Quaid-e-Azam Solar Power (Pvt) Ltd.

Is the Cholistan Desert a good place for solar power?

Now a mini city has emerged in the middle of the desert, with over 2,000 workers accompanied by heavy machinery, power transmission lines, blocks of buildings, water pipes and pylons. The Cholistan desert is an ideal spot for solar power, said Muhammad Hassan Askari, operating manager of the solar park.

Is Pakistan's solar project too ambitious?

Some experts worry the project is too ambitious. Former director general of WWF-Pakistan Ali Hassan Habib, who now runs a company providing rooftop solar solutions, welcomed the project but was uneasy about the government "jumping into untested scale".

Is QASP selling solar power to the grid?

QASP claims it is selling solar power to the grid at \$0.14 per unit. Sources within the National Transmission and Dispatch Company (NTDC) say they have signed a deal to buy electricity at \$0.24 per unit, which will drop later to perhaps \$0.17 per unit after a period of seven years when loans are paid off.

Could a 100MW solar plant produce 85MW at its peak?

But the project's owners say the 100MW solar plant could produce near to capacity at 85MW at its peak. Second, solar energy is more expensive than other energy sources. QASP claims it is selling solar power to the grid at \$0.14 per unit.

100-MW Solar PV Power Plant at Quaid-e-Azam Solar Park, Lal Sohanra, Cholistan, Bahawalpur, Pakistan - project design document (2314 KB) PDD appendices Appendix 1 - 10365 EF ...

The Quaid-e-Azam Solar Park (Urdu: ????? ???? ???? ????) is a photovoltaic power station in Bahawalpur, Punjab, Pakistan, named in honor of Quaid-e-Azam Muhammad Ali Jinnah, the ...

BAHAWALPUR, Pakistan: Pakistan's first ever 100-megawatt solar powered plant was inaugurated in the

Quaid-e-Azam Solar Power Park Bahawalpur by Prime Minister Nawaz Sharif at a ceremony on Tuesday. The ...

The document provides details about the Quaid-e-Azam Solar Park project in Bahawalpur, Pakistan. The project aims to establish a 1000 MW solar power plant to help address Pakistan's acute energy crisis. Phase I was ...

The details of Quaid-e-Azam Solar Park are given below: CPEC prioritized project by Zonergy Co. Ltd. (ZCL) at Quaid-e-Azam Solar Park, Bahawalpur (the "Park") 9 x 100 MW SPP by Zonergy ...

Some 400,000 solar panels, spread over 200 hectares of flat desert, glare defiantly at the sun at what is known as the Quaid-e-Azam Solar Power Park (QASP) in Punjab, named after Pakistan's founding father. The ...

of Quaid-e- Azam Solar Power (QASP) Park near Bahawalpur is under way. QASP site is located about 20 km southeast of Bahawalpur, and it is surrounded by Cholistan ...

In 2013, Government of Punjab planned to build a 1000MW solar park to meet the energy needs through clean and economical ways, Quid-e- Azam Solar Park, Bahawalpur, is an outcome of that plan. It ...

The Government of Punjab, under the vision of Chief Minister Shahbaz Shariff, has dedicated 6500 acres of land near Lal Sohanra, Cholistan, Bahawalpur for the purpose of ...

Government of the Punjab established Quaid-e-Azam Solar Park at Lal Sohanra, Bahawalpur Punjab for the promotion of solar power sector in the province. Necessary infrastructure including road access, water supply and security was ...

Under the China-Pakistan Economic Corridor, renewable energy projects gradually receive due attention, among which the photovoltaic power stations in Quaid-e-Azam Solar ...

Quaid-e-Azam Solar Power Park near Bahawalpur. Solar PV. 100. 31-Jul-16. 43. Appolo Solar Development Pakistan Limited. Quaid-e-Azam Solar Power Park near Bahawalpur. Solar PV. 100. 31-May-16. 44. Crest Energy ...

Quaid-E-Azam solar farm (???? ???? ???? ????) is an operating solar photovoltaic (PV) farm in Punjab, Pakistan. Read more about Solar capacity ratings. The map below shows the ...

The Future of Solar Energy in Pakistan. It was the first step of the 100 MW plant at Quaid-e-Azam Solar Park. The Plant Capacity of the Quaid-e-Azam Solar Park is to be increased Up to 1,000 MW. Now the project is ...

The land of the project area is owned by the government. The solar park area is planned to generate a total of 1,000 MW in three phases: Phase-I for 100MWp, Phase-II for ...

The Quaid-e-Azam Solar Park is located in Bahawalpur, Punjab running on a photovoltaic system of energy production and has the honor of being the first substantial "utility grade" solar plant in ...

The energy crisis in Pakistan has crippled the country's economy with an energy shortfall reaching up to 6000 MW. Fortunately, Pakistan lies close to the Sun Belt and therefore receives very high irradiation. To this end, in the ...

Optimum yield of PV systems is primarily governed by installation parameters (altitude, tilt and orientation) and geographic location (solar insolation and latitude) of instillation site. However, ...

Quaid-e-Azam Solar Park is a 100MW solar PV power project. It is located in Punjab, Pakistan. According to GlobalData, who tracks and profiles over 170,000 power plants ...

Quaid-e-Azam Solar Power (QASP) park is located in Bahawalpur, Punjab, is first large scale solar power generation project in Pakistan with capacity of 100MWp in first phase ...
