

How can I charge my EV faster?

To enable you to charge your electric vehicle faster and get the most out of your EV's charging capacity, we recommend the use of a Level 2 charging station. Provincial and municipal incentives are available in some regions to help cover the cost of purchasing and installing these charging stations.

How do I find EV charging stations in North America?

To easily find EV charging stations in North America, use the ChargeHub EV charging map. This map, available on the ChargeHub app for iOS and Android, shows all public charging station locations, their real-time charger status, and allows you to create itineraries.

Are there public charging stations for electric cars?

Yes, there are three levels of public charging stations for electric vehicles. All vehicles can be connected to either a Level 1 or Level 2 charging station, which have the same charging capacity as those you can install at home.

Which charging level is suitable for all electric vehicles?

While Level 3 charging stations (DCFCs or fast-charging stations) offer much greater power and charge EVs more quickly, some vehicles cannot be charged using them. Therefore, Level 1 and 2 charging stations are suitable for all electric vehicles.

What is a DC fast charging station?

A DC fast charging station, also known as DCFC or 'level 3', is the fastest way to charge your electric vehicle. It's important to note that not every EV can charge with level 3 chargers.

How fast does a Level 2 charging station charge an EV?

Level 2 charging stations charge your EV 3 to 7 times faster depending on the model of the charging station, as well as your electric vehicle and its battery capacity. These chargers require a 240-volt outlet.
