

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

Can I get a rebate if I buy a solar system?

Several states offer rebate programs that cover some or all of the cost of purchasing a home solar system and/or battery storage. These rebates can work in addition with the federal tax credit to increase the savings of going solar. For example:

What is a solar rebate & tax credit?

Rebates -- A one-time incentive for solar installations offered by utilities and/or government agencies. Tax Credit -- A direct dollar-for-dollar deduction off of your income taxes that you would normally pay to the federal government. Tax Deduction -- Deduction of taxable income that can increase your refund or reduce how much tax you owe.

How do solar rebates work?

Sometimes solar rebates are given directly to the resident and other times they're given to the solar contractor who can then charge less for installations. Many utilities will offer additional rebates for solar energy storage systems or other energy efficiency upgrades.

What is a local solar rebate example?

Local solar rebate examples include: The city of Philadelphia created a solar rebate program in 2019 that offered rebates of \$0.20 per watt for residential projects. However, this program was suspended due to budget cuts related to COVID-19. PBIs are incentives based on the energy production of a solar system.

What are the best States for solar rebates & incentives?

The following are the top nine best states for solar rebates and incentives: New York ranks as the top state for solar incentives because it combines what we consider to be the basics -- including sales and property tax exemptions -- with affordable loan programs, several local incentives and an outstanding net metering policy.
