

How do you charge an electric car when renting a car?

You can ask your rental company to show you how to charge the car before you leave the lot. Renters pay for charging expenses, just like they pay for fuel. Some hotels and resorts feature charging stations, which may influence your lodging choices when renting an electric car.

Do I need a charging station for my EV rental?

Enjoy seamless booking and friendly customer service for a hassle-free rental experience. During your EV rental, you may need to use a public charging station. Consider the availability of charging stations, the type of charger (Level 2, or DC fast charging), and the charging speed.

How do I charge a Hertz EV?

While the app requires you to use the chargers, you can opt to pay at the charging point via credit card rather than through the app. Find an EVCS charging station nearby and keep your Hertz EV rental fully charged. According to Experian, there are currently 1.7 million electric vehicles on the road.

How to charge an electric car?

Fundamentally, charging an electric car comes down to locating a station that suits your needs (slow or fast) and your car (Tesla or not). Some bonus tips will make your experience even better. A charging plug with a higher power rating, expressed in kW, can provide a quicker charge. But only if your vehicle can handle the extra power.

Where can I charge my eV if I'm renting a Tesla?

So if you've rented a Chevrolet Bolt, Kia EV6, Polestar 2 or the like, look for non-Tesla charging stations. These will offer the CCS plug for Level 3 charging and/or a J1772 plug for Level 2 charging. On the flip side, if you're renting a Tesla, focus on Supercharger locations for fast charging. That's Tesla's proprietary network of EV chargers.

How do EVs charge?

Once connected to the charging station, EVs use their charging port and onboard charger to convert the external power into battery charge. While all-electric cars (BEVs) must be recharged at a charging station, hybrid vehicles (HEVs and PHEVs) can be recharged at a charging station or refueled at a gas station.

Check the dashboard or the central infotainment screen to find your charge level, often in miles (or kilometers) to go and/or a total percentage. On a Tesla, that number will be pretty prominently...
