

What solar incentives are available in Louisiana?

The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage. Some states and utility companies offer additional solar incentives, saving homeowners even more money. Here are the solar incentives available in Louisiana:

How much does a 5 kW solar system cost in Louisiana?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$14,555 in Louisiana.

How much do solar panels cost in Louisiana?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Louisiana homeowner needs a 11.49 kW solar panel system to cover their electricity needs, which comes out to \$33,689 before incentives. Prices range from \$28,636 to \$38,742, but after the federal tax credit, that drops by 30%.

How can I reduce my solar cost in Louisiana?

As a Louisiana homeowner, the ITC is the most impactful way to bring down your solar costs. The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax.
