

Is New York City embracing residential solar power?

New York City is embracing residential solar power with an upgraded tax abatement and new solar-friendly zoning laws.

Is New York a good state for solar energy?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. This is largely due to the state having some of the highest electricity prices and arguably the best solar incentives.

Does New York have a solar system?

In New York, the sun shines for everyone. New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers.

Why is New York a leader in residential solar adoption?

Despite receiving less sunlight than much of the country, New York State is one of the leaders in residential solar adoption and ranks sixth for projected growth over the next 5 years. That's largely due to the state having some of the highest electricity prices and arguably the best solar incentives.

Is it a good time to go solar in New York?

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits, there's never been a better time to go solar.

How do New York solar incentives work?

New York State solar incentives, combined with the federal solar tax credit, can reduce the net cost of going solar by more than \$15,000. These incentives include tax credits, the NYSERDA incentive, tax exemptions, and abatements.
