

What solar incentives are available in Virginia?

Residents in Virginia can benefit from several solar incentives, including the 30% federal solar investment tax credit, Virginia's Solar Renewable Energy Credits program, property tax exemption and net metering.

How much does solar cost in Virginia?

Interested in going solar? You'll need to install a 12.82 kW solar panel system to cover the average electric bill in Virginia, which will cost you about \$25,886 after the federal tax credit. As long as your federal tax bill is high enough, you can take advantage of the federal investment tax credit (ITC).

How do I get a solar tax credit in Virginia?

To claim the Federal Solar Tax Credit in Virginia, you'll need to consult with a tax expert and your solar panel company. This credit is worth 30% of the cost of your solar panels, making it the most valuable solar incentive available to Virginians.

Are solar panels a good investment in Virginia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Virginia homeowner needs a 12.82 kW solar panel system to cover their electricity needs, which comes out to \$36,980 before incentives.

Are solar panels tax deductible in Virginia?

Virginia has a property tax exemption for the value added to your home by solar panels to help you save money, though. You can also take advantage of the federal solar investment tax credit (ITC) and Solar Renewable Energy Certificate (SREC) program to make solar more affordable for residents.

What is Virginia Energy's Solar for All program?
