SOLAR PRO. Ring solar power

What is a ring solar panel?

Ring solar panel is the early panel made by Ring Inc.whereas,the new and advanced solar panel is called 'super solar panel.' Both are compatible with Ring Inc. security cameras,but there are certain key differences. Now what type of solar panel is best for you depends on two major factors.

How do ring solar panels work?

RING solar panels use the PV effectto convert sunlight into a usable energy source. The panels act as a trickle charger for the camera battery, increasing the battery life by about 1-2% each day, depending on the sun exposure.

How many watts is a ring solar panel?

The panel is rated for 5-wattsof power, over double that of the previous panels in this guide. It is a larger panel but comes with flexible mounting options. BigBlue, a reputable solar brand, offers a 5-watt panel that is compatible with both RING home security cameras.

Does ring sell solar panels?

RING sells a solar panelthat is guaranteed to be compatible with the device, but other panels will work as well and some may even work more efficiently. In this guide, we are going to look at the specifications for a RING brand solar panel and we already reviewed a few alternative panels for the device above.

Are ring solar panels sustainable?

Ring solar panels reduce reliance on traditional power sources. You can save money on electricity bills since solar energy charges the battery. This makes solar panels a sustainable choicefor your home security. Ring solar panels provide continuous battery charging, even in varying weather.

Can I use the ring solar panel with a ring device?

When using the Ring solar panel with any supported Ring Device, you should always choose "Battery Mode." Ring solar panels only work with Ring devices that come with a battery. If a device has no battery, the Ring solar panel can't be used with it.
