

Does Rocky Mountain Power offer net metering?

Rocky Mountain Power offers net metering or net billing compensation to customers in Idaho, Utah, and Wyoming. In Idaho, there is no overlap between service areas for Rocky Mountain Power and the state's other large energy suppliers, Avista Utilities and Idaho Power.

Does Rocky Mountain Power offer incentives?

If you are planning a project over 25 kW and plan to sell power to Rocky Mountain Power, find information on qualifying facilities, grid connection requests and market-based incentives. If you have onsite solar generation, you can earn incentives for allowing us to automatically manage your battery as part of our smart grid.

How many tiers are there in Rocky Mountain Power net metering?

There are three tiers within the Rocky Mountain Power net metering program, each with their own requirements for interconnecting a solar panel system. Tier 1 is less than 25 kilowatts (kW), which is the tier most residential units fall under.

Does Rocky Mountain Power offer metering credits in Utah?

Importantly, Rocky Mountain Power doesn't offer full retail rate for their net metering credits in Utah: as of 2021, customers receive a credit rate of about 6 cents per kilowatt-hour (kWh), or roughly half of the retail rate. UAMPS is still in the process of creating a rate structure for its customers.

What is Rocky Mountain Power's unused energy rate?

At the beginning of every calendar year, unused credits are sold to Rocky Mountain Power at the average wholesale energy rate for winter and summer, which is determined in Schedule 37 avoided cost rate. The current "avoided cost" rate is approximately 3 cents/kWh.

Do I need a roof to get solar power?

Through Rocky Mountain Power's Subscriber Solar program, customers can get some or all of their energy from solar power without the need for a roof. Blocks for this program get sold out quickly, and if they are available, they will be displayed in the box above.
