SOLAR PRO. Selling solar power to tenants

Can a tenant invest in a solar energy system?

Tenants have an interest in low-cost electricity from renewable sources, but cannot invest in a solar systemas part of the rental property. Landlords can invest, but have no need for electricity. This hurdle to the expansion of solar energy could possibly be overcome on the basis of the law on service charges.

Can a tenant buy solar power?

The tenant must agree to purchase this electricity from you; you cannot make it a requirement on a lease addendum although you can certainly make it a requirement on a new lease. Since there is no negatives associated with solar power, there should be no reason any tenant should not want pure clean power that is generated on site.

How to sell electricity to tenants?

In order to calculate the kWh rate, simply divide the usage charge by the number of kWh on their utility bill. You should get a number between \$.10 and \$.30 per kWh depending on the rate and utility. Follow these few simple rules and increase the income and value of your buildings by selling electricity to your tenants.

Can a rental property use a solar system?

The so-called "user-investor dilemma" is still considered one of the hurdles that impede the use of solar installations on rental properties' rooftops. Tenants have an interest in low-cost electricity from renewable sources, but cannot invest in a solar system as part of the rental property. Landlords can invest, but have no need for electricity.

Can I sell power to my tenant?

The quick answer is yesyou can sell power to your tenant. The important words are in that sentence, though. The landlord can sell power to their tenant as a function of their lease payment. It is done all the time. If you already have negotiated a lease rate based on the tenant buying the electricity, then what do you do?

Are solar power plants a legal hazard for landlord-to-tenant tenants?

Landlord-to-tenant electricity generated from PV power plants is fraught with many legal pitfallsregarding rental and funding aspects.
