

What is a solar power plant in SimCity?

The Solar Power Plant is a power plant building seen in the SimCity series. On cloudy days, the solar power plant will provide little to no power at all. On sunny days however, it is a clean and relatively cheap way to get power. The solar power plant is similar to the one on SimCity 2000, but isn't at the whim of the weather.

Does SimCity 2000 have a solar power plant?

The solar power plant is similar to the one on SimCity 2000, but isn't at the whim of the weather. The oil power plant generates 7,000 megawatt hours per month of electricity.

How many solar arrays are there in SimCity?

Each solar power plant can have a maximum of 16 total solar arrays. The solar power plant is the only ploppable power plant in Simcity that does not lower land value, so it can be placed anywhere in the city. If there are any high density buildings in the city, each Concentrated Solar Array will produce 30MW (7.5 MW less).

Is it necessary to have a power plant in SimCity?

In SimCity, players need to lay down power plants to power nearly everything in town with few exceptions. These power plants have major advantages and disadvantages, mostly costs and pollution. Without a power plant, the city will not grow. Here are the following power plants featured in the SimCity series:

What is the most expensive power plant in SimCity 4?

The Solar Power Plant is the most expensive power solution in SimCity 4, only becoming cheaper than the Wind Power Plant after six in-game years at full funding. However, the Wind Power Plant is cleaner as it produces no pollution and does not need to be unlocked.
