

How does Sola/Hevi-Duty's power conditioner work?

Sola/Hevi-Duty's power conditioner works by recreating a well regulated sinusoidal waveform using its patented ferroresonant transformer technology. This waveform is well isolated from input disturbances such as impulses, swells, sags, brownouts, and severe waveform distortion.

Why should you use Sola/Hevi-duty MCR & MPC?

Sola/Hevi-Duty's MCR and MPC offer excellent noise filtering and surge protection to safeguard connected equipment from damage, degradation, or misoperation. Additionally, the MCR's patented ferroresonant design enhances the Mean Time Before Failure (MTBF) of protected equipment.

Why is Sola a good power conditioner?

Sola power conditioners are excellent at tightly regulating voltage within $\pm 1.0\%$ for input variations up to $+10\%/-20\%$. They also offer superior noise attenuation and are designed to withstand harsh electrical environments. Additionally, they have no moving parts, making them virtually maintenance-free.

Does Sola/Hevi-duty offer ODVA power supplies?

As a member of the Open DeviceNet Vendors Association (ODVA), Sola/Hevi-Duty has designed two power supplies specifically for DeviceNet applications. Sola's SDN DeviceNet™ models meet ODVA specifications for power supplies for either Thin or Thick cable applications.

What is a Sola MCR and MPC?

The Sola MCR and MPC are power conditioners that provide excellent noise filtering and surge protection to protect connected equipment from damage, degradation or misoperation. They increase the actual Mean Time Before Failure (MTBF) of protected equipment due to their excellent voltage regulation, which is inherent to Sola/Hevi-Duty's patented ferroresonant design.

Why should you choose Sola MCR hardwired?

The MCR is a perfect choice where dirty power, caused by impulses, swell, sags, brownouts and waveform distortion can lead to costly downtime because of damaged equipment. The Sola MCR Hardwired Series provides excellent noise filtering and surge suppression to protect connected equipment from damage, degradation or misoperation.
