

How do solar roofblasters work for Conex containers?

Solar RoofBlasters for Conex Containers bring in fresh, cooler air and expel the hot air, allowing air to circulate throughout the container anytime the sun is shining. This helps to remove odors, gas fumes, and moisture buildup by creating uniform air movement.

How many tubes can fit in a Solar Blaster vent?

To get free shipping on the sealant, you must order no more than two tubes per vent or LightBlaster product on the same order -- as that is what can fit inside each Solar Blaster vent and LightBlaster box. It can be installed in wet conditions and is compatible with all roofing applications. 10.2 fl oz tube.

Can a solar roofblaster vent be installed on a military building?

Solar RoofBlaster vents have been installed on many military containers, sheds, and other temporary military buildings. These vents can help improve the working conditions inside these structures.

What type of buildings can Solar RoofBlaster vents be installed on?

Solar RoofBlaster vents and LightBlaster tubular skylights have been installed on many military containers, sheds and other temporary military buildings. These temporary work and storage stations don't have to have unbearable working conditions inside of them.
