

Does SolarCity offer a power purchase agreement?

SolarCity doesn't just offer leases -- they also provide Power Purchase Agreements (PPAs), loans, and the ability to buy the system outright. A power purchase agreement, if you're not familiar with the term, is where the company retains ownership of the panels and sells you the electricity.

What is a power purchase agreement for solar energy?

A Power Purchase Agreement (PPA) is most commonly used in the sale and purchase of renewable energy, especially that generated from solar panels. The agreement can be beneficial for businesses who wish to reduce their carbon emissions when they enter into a PPA for solar energy.

What is a Solar Power Purchase Agreement (SPPA)?

A Solar Power Purchase Agreement (SPPA) is an agreement for the purchase of electricity generated by a solar energy system. The cost is typically charged for each kWh generated by your system. You'll receive a monthly bill based on how much energy you received from the system. SPPAs are contracts for the purchase of solar electricity. They are typically anywhere from 7 to 25 years, with short contracts having a higher cents per kWh charge and longer contracts having a lower c/kWh charge.

What is a retail solar power purchase agreement?

A retail solar power purchase agreement is a long-term contract to purchase power from a third-party owner and operator of a solar energy generation system. In this report, the model agreements are drafted for a municipal government to purchase all of the energy produced by the solar project.

What is SolarCity & how does it work?

What is SolarCity? Founded by Peter and Lyndon Rive in 2006, SolarCity quickly became one of the biggest solar installers in the US residential market, serving customers in 19 states. Their business model has mostly been based on leasing or Power Purchase Agreements (PPAs), which they helped to pioneer.

Does SolarCity offer a PPA loan?

SolarCity initially offered a loan product by the name of MyPower, that was structured very similarly to a PPA. It was poorly received, with some very unfortunate terms meaning you could end up still owing money after 30 years if the panels didn't perform as well as expected.
