

How much can you save on solar panels in Massachusetts?

Solar panel systems in Massachusetts are expensive, but incentives from the state and federal governments can help you reduce the upfront cost. Between the federal tax credit and state-specific incentives, you can save thousands on solar panels, making them well worth the investment.

Are solar batteries tax deductible in Massachusetts?

Massachusetts does not have any state-specific tax incentives for energy storage systems like solar batteries. However, homeowners installing a solar battery can still save on their taxes with the federal investment tax credit (ITC).

What is solar Massachusetts's renewable target program?

The Solar Massachusetts's Renewable Target (SMART) program pays Eversource, National Grid, and Unitil customers a bonus for each kilowatt-hour (kWh) of electricity produced by their solar panel system. An additional bonus, or 'adder', is offered if a solar panel system is paired with a battery.

What storage incentives are available in Massachusetts?

The Solar Massachusetts's Renewable Target (SMART) program pays a bonus for each kilowatt-hour (kWh) of electricity produced by solar panel systems in Massachusetts. This applies to customers of Eversource, National Grid, and Unitil.

What is the energy storage initiative?

It can improve grid operations, reduce energy costs, provide backup power through storms, and benefit the local economy. The Energy Storage Initiative aims to make the Commonwealth a national leader in the emerging energy storage market requiring a 1,000 Megawatt hour (MWh) energy storage target to be achieved by December 31, 2025.

Massachusetts solar incentives like tax credits and rebates allow you to save money when you go solar - learn which incentives are available. [Open navigation menu.](#) ...

Massachusetts' long-awaited clean energy bill speeds up the siting process and directs utilities to solicit at least 5,000 MW of storage. ... with creating a statewide energy ...

Massachusetts Governor Maura Healey signed Senate Bill 2967 into law that includes siting and permitting reforms that will help to speed the buildout of solar and other clean energy technologies. It extends regional ...

In all, the ACES projects represent 32 MW and 85 MWh of energy storage capacity, of which 16 MW and 45 MWh are within electric distribution company territory. At ...

BlueWave Solar is working to create better solar energy options in every neighborhood we serve. Join the

solar energy revolution! ... Leasing my property for solar or energy storage ...

Here is the definitive list of MA's top storage companies as rated by the Massachusetts community. ... All Energy Solar. Westfield, MA 326 Reviews. Write a review. ...

SMLD was also the first light department to develop a community solar-plus-storage project in the state. Online since 2018, the 1 MW, 2 MWh battery is exclusively powered by its 1 MW community solar project. ... broadly ...

The Energy Storage Initiative (ESI) aims to make the Commonwealth a national leader in the emerging energy storage market. Energy storage is a significant strategic opportunity for Massachusetts. It can improve ...

The strong economic value proposition for solar and storage in Massachusetts has been driven by favorable state-level incentive programs, relatively high retail electricity rates, and a supportive state legislature. The ...

As of April 2025, the average storage system cost in Massachusetts is \$1690/kWh. Given a storage system size of 13 kWh, an average storage installation in ...

Solar + storage is a term that is used to describe any storage medium or battery-backed solar energy system. Solar + storage is required in order to operate an off-grid, standalone system. Batteries are quickly gaining ...
