

Why do we need a Green Hill solar farm?

We need to get large amounts of renewable energy in the system to help ensure energy security and combat climate change- as well as helping reduce people's energy bills. Green Hill Solar Farm would provide a maximum power output of 500 MW, providing a substantial source of renewable electricity for the region and country.

What is the UK's largest solar project?

These range in size from below 5 MW to Nationally Significant Infrastructure Projects (NSIP) such as the Cottam Solar Project, currently the UK's largest consented solar project. Cottam will generate 600 MW of clean, renewable and secure electricity, while including 600 MW of battery storage that will store and then release energy as needed.

How many solar projects are there in the UK?

These include 17 solar projects in the UK and Republic of Ireland. These range in size from below 5 MW to Nationally Significant Infrastructure Projects (NSIP) such as the Cottam Solar Project, currently the UK's largest consented solar project.
