

Solar exhaust vents for steel shipping container storage

What is a big air 400 CFM solar powered roof vent?

The BIG AIR 400 CFM Solar Powered Roof Vent is engineered to be installed on the roof of shipping containers. The vent comes with a 11 7/8 x 14 11/32 range hood filter (Bug Screen) In order to exhaust the full 400 CFM, 2 Big Air 45 Vents are required for air intake. As an Amazon Associate, we earn from qualifying purchases.

Do you need a vent for a sea can?

If condensation does become an issue, installing proper ventilation will prevent any problems in the future, such as mould or mildew growing inside your sea can. If you need a vent that exchanges air within the container consistently, check out Container Modification World's Solar Powered Exhaust Vent.

How often do you need a vent in a container?

If you need a vent that exchanges air within the container consistently, check out Container Modification World's Solar Powered Exhaust Vent. This vent will exchange the air every three minutes in a 20' container, and every six minutes in a 40' container. It will eliminate moisture and excess heat.

Do shipping containers have ventilation holes?

Most shipping containers will have built-in holes to act as ventilation. But the problem is that these holes aren't enough for this situation. It's best to install a ventilation system such as having intake vents, louver vents, or even a window.

What is a solar powered exhaust fan kit?

With our Solar Powered Exhaust Fan Kit, you can effectively improve ventilation and control the temperature inside your shipping container. By removing excess heat and moisture, this kit helps prevent damage to your stored items and creates a more comfortable and functional space. Don't miss out on the benefits of our Solar Powered Exhaust Fan Kit.

How many vents does a container have?

Containers have two to four vents pre-installed, but these are designed to equalize air pressure and keep seawater out, not exchange airflow. So, when you are using a container for storage without proper airflow, condensation might build up in your can.
