

What is a solar-powered address sign?

The solar-powered address sign from LeiDrail is among our top recommendations, especially because of its clear number markings. It uses amorphous silicon panels to illuminate itself at night with bright white lights, allowing visitors, emergency vehicles, and courier services to find your residence with ease.

How do solar address signs work?

The 12.8" x 2.4" x 6.4" solar address signs will quickly guide them to the location of your home. Make your home more inviting and recognizable with our solar powered address sign lights. The solar house numbers for outside automatically charge during the day and stay on all night when fully charged.

What is a solar LED address number sign?

The solar powered LED address numbers sign also comes with a template for a 3/4/5 digit number. A solar address sign is not only a beautiful decoration for your home, but also an ideal gift for your friends and family. The cold light design is bright and atmospheric, and the warm light design is cozy and easy on the eyes.

What is a solar address light?

Solar Address Lights and signs will ensure your house number is visible for guests, deliveries and emergency vehicles, even when the electric power is out. Buy a sturdy Black metal solar address light with ground stakes, with your choice of a double pole or a single pole.

How to install a solar address sign?

Easy to install, just point the solar panel towards the sun. The frame is made of black sturdy ABS, simple and modern design. IP65 waterproof rating, heat resistant, adaptable to any weather conditions and architectural style. Efficient Solar Panels---The solar address sign uses a monocrystalline silicon solar panel.

When do solar address lights turn on?

Solar address lights turn on automatically at dusk. Either lit from behind, or with a craning spot light, these address lights ensure your home is visible at night.
