

Are solar roof vents a good option for attic ventilation?

As home owners resort to being more energy efficient and environment friendly, the popularity of attic ventilation through solar roof vents has experienced an increase. Not only do these solar systems regulate temperatures in attics but they also help in the saving of energy by reducing the intake of air during warmer months.

How do you install a solar attic vent on a roof?

To install a solar-powered attic vent on your roof, first mark the location between two roof rafters in the attic. Then, drive a nail through the center of the vent location. Next, install roof brackets and a fall-arrest system to the roof. Using a homemade dowel compass, scribe the outline of the vent's flashing on the roof. Finally, cut shingles along the circular outline with a utility knife.

What is a solar attic fan?

A solar attic fan is an active ventilation system that is typically installed on the roof of an attic. These fans use solar panels to collect energy from the sun to propel fan blades, which provide constant air flow to an attic space. They also help extract excessive heat and moisture.

How does a solar roof vent work?

The Master Flow(TM) Green Machine(TM) High Power Solar Roof Vent, Solar Powered Model PRSOLAR2, uses the sun's power to help reduce damaging heat and moisture in the attic. It does this by solar power eliminating energy costs associated with operating a purely house-powered unit.

What are the wattage options for Air Vent's solar attic fans?

Air Vent, Inc. also has some respectable solar attic fans available on their website. They have both roof-mounted and gable-mounted fans, and the roof-mounted ones have an option for the panel and the fan to come separately. Depending on the size of your attic, you may decide whether the 10-Watt or the 25-Watt is appropriate for you.

Can a solar attic fan help reduce energy costs?

A solar attic will help improve the ventilation in your attic, which results in lower energy costs to cool the entire home. Lower energy costs = lower utility bill = winning! On top of that a solar attic fan is also highly beneficial during the winter as it helps reduce moisture build-up in your home.
