

Can a solar attic fan help reduce energy costs?

A solar attic fan will help improve the ventilation in your attic, which results in lower energy costs to cool the entire home. Lower energy costs = lower utility bill = winning! On top of that a solar attic fan is also highly beneficial during the winter as it helps reduce moisture build-up in your home.

What is a solar attic fan?

A solar attic fan is an active ventilation system that is typically installed on the roof of an attic. These fans use solar panels to collect energy from the sun to propel fan blades, which provide constant air flow to an attic space. They also help extract excessive heat and moisture.

Should I install a solar attic fan?

If you're wondering should I add a solar attic fan to your home, consider these benefits. A solar attic fan can keep your attic ventilated and usable year-round, help cool your home, and reduce your energy costs during the hottest months. We can provide answers regarding the benefits of solar attic fans for your home.

What energy source do solar attic fans use?

Solar attic fans are environmentally friendly, harnessing the sun's power without the need for electricity. As a renewable energy source, your solar attic fan will help reduce your carbon footprint and help you save money in the process.

Are solar roof vents a good option for attic ventilation?

As home owners resort to being more energy efficient and environment friendly, the popularity of attic ventilation through solar roof vents has experienced an increase. Not only do these solar systems regulate temperatures in attics but they also help in the saving of energy by reducing the intake of air during warmer months.

What are the wattage options for Air Vent's solar attic fans?

Air Vent, Inc. also has some respectable solar attic fans available on their website. They have both roof-mounted and gable-mounted fans, and the roof-mounted ones have an option for the panel and the fan to come separately. Depending on the size of your attic, you may decide whether the 10-Watt or the 25-Watt is appropriate for you.
