

What can you charge with a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices.

Which solar power bank is the best?

The Solgaard Solarbank is our top pick due to its high value. It's light, durable, charges quickly, and stores up to 5 full phone charges. However, if you need a larger battery capacity, consider other options as well.

Is it a good idea to buy a solar power bank?

If you've been considering a solar power bank, it's definitely time to pull the trigger. Power banks are awesome, especially solar ones. They're environmentally-friendly and can maintain their charge without any electricity. Sunlight is all you need to charge your gear on the go.

What is the typical capacity of small solar power banks?

The capacity of small solar power banks is usually rated via milliamp hours (mAh). Typically, you'll need around 3,500mAh to charge a phone once.

How does a solar power bank function?

A solar power bank, such as the one featured, charges up quickly via solar energy or with two different USB cables. It offers versatility by providing multiple charging options. Additionally, it serves as a large, super-bright LED flashlight with 3 different modes, making it ideal for avid campers or off-the-beaten-track travelers.

What's the advantage of a solar power bank?

Power banks are awesome. A huge advantage is that they're environmentally-friendly and can maintain their charge without any electricity. Sunlight is all you need to charge your gear on the go. If you've been considering a solar power bank for quite a while, it's definitely time to pull the trigger.
