

How to charge a solar power bank?

Solar charging, charge your devices at any time. 1. Turn on/Turn off: Gently press the power switch, then the LED battery indicators and wireless charging function are on. If there is no charging devices, power bank will automatically shut down in 30 seconds. 2. How to charge the power bank:

How does a solar power bank work?

The solar power bank will be automatically recharged when the solar panel is placed directly in the sun(NOTE: Do not expose it to extreme temperatures). The first LED indicator lights up green when the power bank is being charged by the solar panel, and glows blue during charge by the power socket.

Can BLAVOR power banks be used for solar panel charging?

For solar panel charging, we recommend that you hang the power bank in a ventilated environment for solar charging to avoid swell up of the battery due to extreme high temperature. All BLAVOR power banks have undergone extensive tests and the strict quality control procedure. Both our factory and products are tested and certified.

What should I know before using the power bank?

Manuals+-- User Manuals Simplified. Carefully read the User Manual before using the power bank. Close supervision is needed when the power bank is used near children. Do not strike, hit or insert any foreign objects into the power bank or any of its ports. Do not expose the power bank to heavy rain/snow to avoid malfunction.

How do I connect a wireless charging device to a power bank?

Turn on the power switch and the blue indicators are on. Plug two ends of the cable into the power bank USB port and the devices. QC 3.0 USB Output port and TYPE-C Bidirectional PD port support fast charging for mobile phones and devices with fast charging function. Turn on the power switch and the wireless charging indicator in the back is on.

How do I know if my solar power bank is fully charged?

LED indicator lights on and flashes, which means it is charging. All four LED indicator lights are on and steady, which means it is fully charged. The solar power bank will be automatically recharged when the solar panel is placed directly in the sun (NOTE: Do not expose it to extreme temperatures).
