

How do you charge a solar power bank?

Most solar power banks have two power options - wall charging and solar charging. To charge a solar power bank, your best bet for a quick-charge is to plug it in and use the sun rays to keep things kicking.

What is the best solar power bank kit?

For peace of mind on longer trips, the Goal Zero is the best power bank kit you can get. When you're out in the middle of nowhere, rest assured that the solar panel will keep smaller electronics running smoothly.

How many charges can the solar power bank hold?

The solar power bank holds up to five charges, ensuring you won't end up with any dead devices, no matter where you are. Its solar panels let you charge it up with some sunlight or with a USB-C cord - whichever option is most convenient. There's a good reason it's considered the top solar power bank on the market.

Why should you get a solar power bank?

Having a solar power bank means being able to charge all your electronics anywhere, any time. Say good-bye to dead mobile phones during travel or extended periods away from an outlet. No more dying tablets, phones, or other small devices. Sunlight is all you need to charge your gear on the go. Talk about peace of mind!

How many USB ports should a solar power bank have?

The number of USB ports depends on your needs. If you have multiple devices like a mobile phone and a tablet, 2 USB ports would be preferable. However, if you're in a group, having more is better. Most solar power banks offer two power options: wall charging and solar charging.

Which solar power bank should I buy?

The Solgaard Solarbank is our top overall pick for a solar power bank. It's lightweight, sleek, compact, and packs plenty of battery power. It's especially handy when paired with the Solgaard backpack, making it a great choice for travel or everyday use.
