

How does a 25 kW solar array work in Bozeman?

The energy produced by this 25 kW ground-mounted solar array will offset the electrical usage of three center pivot pumps located on the Pheasant Farms property just outside of Roundup, MT. Bozeman residents Jeff and Kathy Ball offset more than 100% of their annual energy load with a 5kW solar installation.

Why should you buy a solar electric system?

National studies produce clear data that home with Solar Electric systems sell faster and for more money. As sure as the sun will rise, your solar electric system will create energy and keep money in your pocket. A penny saved is not only a penny earned but one you can monitor, calculate and keep track of in real-time.
