

How many solar panels are there in Cairns?

The Australian Photovoltaic Institute estimates that there have been almost 10,000 residential solar installations in Cairns meaning that almost 35% of the dwellings have solar panels already installed. Find out why there are so many solar panel Cairns customers and what you need to know before buying.

Who is Cairns solar energy solutions?

At Cairns Solar Energy Solutions, we combine local expertise with a passion for renewable energy. Founded by Luke Burns, our company has been delivering quality solar systems for over two decades. Our team is committed to safety, efficiency, and helping Cairns residents lower energy costs while reducing their environmental footprint.

Why should you install solar panels in Cairns?

With over 20 years of experience in Far North Queensland, we specialise in solar systems built to thrive in Cairns' unique climate. The region's subtropical climate and consistent sunlight exposure make it ideal to install solar panels. This offers significant energy production potential and cost savings for homeowners.

Why should you switch to solar energy in Cairns?

Switching to solar is easier than you think. Cairns Solar Energy Solutions offers flexible payment plans and helps customers access Queensland's solar rebates. We make solar power affordable, reducing upfront costs so you can start saving immediately. Cairns' tropical climate is perfect for solar energy, but it requires the right system.

Does Cairns need a solar system?

Cairns' tropical climate is perfect for solar energy, but it requires the right system. Our solutions are engineered to handle high temperatures and cyclones, ensuring reliability and efficiency. Regular maintenance keeps your system running at peak performance year after year.

Why should you invest in solar energy in Cairns?

Solar energy is clean and renewable, reducing greenhouse gas emissions and helping combat climate change. Take advantage of Queensland's solar rebates and feed-in tariffs to offset installation costs and earn money from surplus energy. Cairns' abundant sunshine ensures consistent energy production, even during peak demand periods.
