

What can you power with a camping solar charger?

Thanks to solar energy, you can power basic electronic devices without needing to connect to an outlet. Whether you want to keep your phone powered in case of emergencies or just charge your GPS for navigation, having a camping solar charger is one way to make your camping experience more enjoyable.

What is the difference between portable and camping solar chargers?

Portable solar chargers are generally larger and have a higher capacity to convert sunlight into energy than portable models. Solar panels for camping also have a higher capacity to convert sunlight into energy.

What is the best solar charger for off-grid camping?

For off-grid camping, a 110-watt solar panel is best for charging a large power station. These high-wattage solar chargers (100 watts or more) are the largest you can still pack away to move, offering fast charging speeds for large battery banks or power stations.

Where can you use a solar charger?

A solar charger can keep your devices charged when you're deep in the backcountry, whether that's camping, boondocking, backpacking, or traveling. We put each of these chargers through their paces in a myriad of locations and conditions.

What are portable solar chargers good for?

Portable solar chargers are perfect for camping, travel and emergency use. Compact and lightweight, they can provide a practically unlimited supply of electricity for your mobile devices, flashlights and battery packs or portable chargers, as long as the proper conditions are met.
