

Why is my solar powered Christmas lights not working?

You can refer to the owners manual for the amount of time needed to charge the battery. Another thing that can cause the battery not to charge and your Solar Powered Christmas Lights not to work is the fact that your solar panel could be dirty. You will want to make sure that you clean off all dirt and debris from the face of the solar panel.

Will a solar powered Christmas light work if the power button is off?

The power button being in the off will not allow your Christmas lights to work or turn on. Depending on what brand and style of solar powered Christmas lights you have will depend on the location of the switch. Once you locate the switch you can then set it to the ON position. Cleaning The Solar Panel Free Of Dirt & Debris

How to fix solar lights not working?

Switch your solar light to a different location and see if the problem is fixed. Place it in a location with adequate sunlight during the day and no intervention from other artificial lights at night. So, these were a few common ways to fix Solar lights not working.

How do I know if my solar powered Christmas lights are bad?

The third thing you will want to check on your solar powered Christmas lights is to make sure that the battery is still able to hold a charge. If you have had your lights in the sun for as many hours as the instruction manual says and the lights are not holding a long charge then your battery may have gone bad.

Why aren't my solar lights turning on at night?

The most common reason for solar lights not lighting up at night is an off switch. Almost every solar light has an on/off switch, typically located at the back. If the switch is off, the lights won't turn on even if the solar panel has charged the battery during the day. So, if your solar lights aren't lighting up, the first thing to check is this switch.
