

What is a solar power purchase agreement?

A solar power purchase agreement (PPA) is an arrangement where a solar company installs and maintains a renewable energy system on a home, selling the generated power to the homeowner at a low rate. This is one of the many solar energy arrangements, often referred to as 'solar'.

What happens at the end of a solar PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. If you need more electricity than the solar panels produce, you will pull electricity from the grid.

What is open solar contracts?

As a response, the International Renewable Energy Agency (IRENA) and Terawatt Initiative (TWI) undertook a joint effort to simplify and streamline the contractual framework for solar power. The Open Solar Contracts initiative aims to unlock greater investments globally.

Should I buy solar panels at the end of my PPA contract?

At the end of your PPA contract, you can choose to renew the agreement, have the system removed, or purchase the solar panels at fair market value. However, purchasing the system at the end of the contract would actually cost you more in the long run than if you had purchased a system to begin with.

How does a solar company operate?

In a Solar Power Purchase Agreement (PPA), the solar company retains ownership of the system it installs on your property. They agree to sell you the energy produced by the system at a rate lower than what you would pay your utility. This allows you to save money on your electricity bills.

How long does a solar power purchase agreement last?

Solar power purchase agreements are long-term commitments. You'll be locked in for 10 to 25 years or longer. If you need to terminate the agreement early, you may face fees, so make sure to read the fine print first.
