

What is a solar cooler for camping?

A solar cooler for camping is exactly what it sounds like- a food cooler that runs off of the power of the sun. As with all other things solar-powered, camping coolers are all about convenience. They offer you more independence from the grid, allowing you to go for long without restocking on ice.

What is a portable solar powered cooler?

Portable solar powered coolers are a type of cooler that can be charged off of a wall outlet (120v or AC), 12v outlet (DC), or a portable power station. These coolers from Amazon get their energy indirectly from the sun, meaning they do not require additional ice for cooling. Instead, they can keep drinks at 0o C.

Should you buy a solar-powered camping cooler?

As with all other things solar-powered, camping coolers are all about convenience. They offer you more independence from the grid, allowing you to go for long without restocking on ice. Ditching the hassle of ice saves you money while allowing you more time to relax and connect with nature.

Should I buy a solar cooler for my RV?

Taking an RV on a camping trip is definitely a luxury. Many RV owners would attest that having a mini-fridge to keep your food and drinks cool makes mealtime simple and easy. But before you run to your nearest retailer and buy a traditional mini fridge, consider the alternative: a solar cooler.

Is a solar-powered cooler right for You?

Solar energy is one power source we often overlook when outdoors, which needs to change. It's reliable, eco-friendly, and available (for the most part) anywhere you find yourself camping or adventuring. A solar-powered cooler is the peak of modern off-grid technology.

What is a solar cooler?

A solar cooler is a portable cooler that uses solar power to lower its temperature. They are made of durable materials such as iron, making them strong and sturdy enough to handle the abuses of daily use. These coolers from Amazon use a simple evaporative cooling principle to reduce the temperature of their contents quickly and efficiently.

Many have power-savings features and some can operate with solar. Average power consumption over a day tends to be low compared to other types, as the compressor only operates when needed. They're heavier, but ...
