

How much does it cost to install a solar panel?

(Mar 2025) Solar panels generate "free" electricity, but installing a system still costs money. A typical 8-kilowatt (kW) solar panel system costs \$22,712 before considering any financial incentives. Your energy needs determine the system size you need, which affects the overall price of your solar panel installation.

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is \$2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels--ideal if you have limited roof space.

How much does a solar system cost?

Leasing a system is cheaper upfront, but you won't get the federal tax credit. The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024.

What is a solar panel cost calculator?

A solar panel cost calculator is a tool to estimate solar costs and potential savings. Our calculator provides a sense of how much you can expect to pay and save by installing solar panels. However, it's important to note that every calculator has limitations and its results should be taken with caution.

Are home solar systems still expensive?

Home solar systems have an outdated reputation for being an expensive luxury item. However, the cost of solar has significantly decreased in recent decades, making it more accessible to many homeowners due to state and federal incentives. According to the Solar Energy Industry Association:

What is the cost of solar panels per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

Solar panel systems cost between \$18,000 and \$43,000 before incentives. Federal, state, and local incentives can cut solar costs by 30-60%. The average payback period for solar panels is 8.5 years, with up to \$90,000 ...

Solar panel installation costs a national average of \$16,500 for a 6kW solar panel system for a 1,500 square ft. home. The price per watt for solar panels can range from \$2.50 to \$3.50, and largely depends on the home's ...

While the cost to install solar panels on your home may fluctuate, leasing solar panels through the Sunrun Subscription Plan allows you to take advantage of customized clean energy, resilient backup power, and ...
