

How much do solar panels cost in Brisbane?

Based on the data from February 2025 - the average cost of a typical 6.6kW solar panel system in Brisbane is \$5,210 after the STC rebate has been deducted.

Where can I get free solar panels in Brisbane?

EISS offers its services across Brisbane, the Gold Coast and surrounding areas. Evergreen Electrical, established over 12 years ago, specialises in solar panel installation and renewable energy solutions. It offers free solar quotations and information on rebates and discounts.

Which solar power system is best for Brisbane homes?

A 6.6kW solar power system is perfect for Brisbane homes. 6.6kW solar systems typically come with 20 x 330W solar panels, and a 5kW inverter - allowing you to claim 33% more solar rebate than a 5kW system, and also help you to produce more power during low light conditions.

Do solar panels Brisbane meet your current power usage needs?

Solar panels Brisbane can easily meet your current power usage needs. The cost of a solar battery backup system will greatly depend on system size and use case for the battery. As most households will use 30% of their power throughout the day and 70% at night, so the battery storage system needs to hold 70% of your daily usage.

Are solar batteries a good investment in Brisbane?

The return on investment for solar batteries in Brisbane is currently lower than the return for solar panels. This is mainly due to the fact that the cost of solar batteries is comparatively much higher and there is no rebate available for battery storage in Queensland or federally across Australia.

How much does a 6.6 kW solar system cost in Brisbane?

The average cost of a 6.6 kW solar system in Brisbane is \$5,530 after applying the federal STC rebate. This cost has been decreasing over the past few years, making it more affordable than ever to install solar in Queensland. Jeff has consulted on over 20MW of commercial solar projects, ranging from SMEs to ASX top 100 companies.
