# **SOLAR** PRO. Solar power energy credits

#### What is a solar energy credit (SREC)?

SRECs are just one type of renewable energy credit(REC) that energy utilities can buy to meet state requirements for renewable energy production. Some states mandate that a certain percentage of energy comes specifically from solar (known as a solar carve-out).

#### How do solar energy credits work?

You can earn these credits regardless of whether you use the power you generate for your own home or send it to the electric grid through net metering. A typical home solar energy system should produce between seven and nine SRECs per year. You can then sell them on the local SREC market.

#### Do solar projects generate carbon credits?

Yes, they do. Solar projects are one of the common initiatives that companies invest in to produce RECs and these credits are another form of carbon credits. In particular, solar projects generate solar renewable energy credits (SRECs). They share the same concept as RECs but are solely from solar energy projects.

#### Can you sell solar energy credits?

With grid electricity prices soaring,home solar is already a means of substantial energy savings. But homeowners in eligible statescan sweeten the deal by selling Solar Renewable Energy Credits (SRECs) to earn hundreds or thousands of dollars each year. In this article,we'll answer: What is an SREC? Let's get started with the big question.

#### Are there any solar incentives & rebates?

Thankfully, there are a number of solar incentives and rebates available in most states. Some of the most important are solar renewable energy credits, or SRECs for short. These credits allow you to earn money for the solar power your home produces.

#### What is the federal tax credit for solar photovoltaics?

One of the many things this act accomplishes is the expansion of the Federal Tax Credit for Solar Photovoltaics, also known as the Investment Tax Credit(ITC). This credit can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system.
