Quick and easy to install, all Gallagher Lithium Solar Energizers come with an internal lithium battery, built-in earthing and state of the art solar technology. Designed to keep pets and livestock in, and pests out!

What is a solar-powered electric fence charger?

A solar-powered electric fence charger is a device that uses a solar panel to provide electric fence energization. It consists of three main components: a fence charger, a battery, and a solar panel. These chargers are essential for maintaining the safety and security of your livestock.

What voltage should a solar fence energizer use?

It is recommended to use 12-volt solar fence chargers for reliable protection. Solar fence chargers require an output joule per joule of Fence energizer to power the Fence energizer and protect livestock. This means that a solar fence charger with a higher voltage will require a higher output joule to achieve the same level of protection as one with a lower voltage.

What is the best energiser for a multi-wire fence?

The S100 is the ultimate portable energiser solution, storing 1,0 J and capable of powering up to 6 mile/10km or 10 hectare of Multi-wire fence. This fence energiser comes complete with a rechargeable battery and solar panel. The S100 is quick and easy to install and convenient to transport.
