

Should you go solar if you own a multi-family building?

These benefits aren't restricted to homeowners living in single-family homes or condominiums - you can enjoy all of the benefits of solar even if you own a multi-family building. Going solar is a smart decision for your wallet and can be a valuable asset for your tenants, too.

Can you install solar panels on a multi-family home?

Create your own clean energy with solar panels. Enjoy the benefits of solar without rooftop panels. Explore heat pumps, the latest in clean heating & cooling technology. You don't have to live in a single-family home to go solar - you can install solar on a multi-family home and start saving today.

Should I install a solar energy system exclusively for my unit?

If you decide to install a solar energy system exclusively for your unit, you simply connect the system to your unit's electric meter and enjoy the benefits of reducing your electricity bill and your environmental footprint.

Should I provide solar electricity for my rental units?

If you decide to provide solar electricity for your rental units, your solar benefits will depend on the electric metering and rental agreements for your building. If the tenant pays their own electric bill: If the tenants living in your units pay their own electric bill each month, the addition of solar power can help them reduce costs.

Does owning a Solar System add value to your property?

Owning a solar system can also add to the value of your property. If the property is owned by a corporate entity, you may also be able to recover some costs through depreciation. (Consult your tax advisor if you have any questions about how this might work.)

Is solar a good option for a landlord?

Solar can be a great way to attract tenants who care about the environmental or clean air benefits of solar power, and this "feature" of the unit can justify higher rents, adding to the financial benefits for the landlord. There are plenty of financing options available to help you go solar.
