Who is powerhour solar & electrical?

Powerhour Solar &Electrical is an industry-leading solar installer and supplierbased in George,Western Cape. With over a decade of experience we service and maintain an ever-growing client base of 2000+customers.

Are solar panels energy-independent in South Africa?

Every household in South Africa that have solar panels installed,functions as a small scale power plant. This,in turn,provides us with a greater electricity grid security. Once you have solar panels up on your roof,you've technically reached an energy-independent status.

Is solar energy a good idea?

Solar energy is clean. It creates no carbon emissions or other greenhouse gases. It also avoids the environmental damage associated with mining or drilling for fossil fuels. Furthermore,solar energy also uses little to no water,unlike power plants that generate electricity using steam turbines.

How can solar energy reduce your home's electricity bill?

For those who cannot afford to buy an entire solar energy system to reduce your home's electricity bill. Simply choose solar lights and a water heating solution that are powered by the sun instead of your home's electrical system. This will help you to save money. Homes with solar panels installed may improve your property value.

Is solar power scalable?

Solar power is scalable. This means that it can be deployed on an industrial scale,or it can be used to power a single household. When it's used on a small scale,extra electricity can be stored in a battery bank or fed back into the electricity grid. Overall,the sun gives off far more energy than we'll ever need.
