

How much does solar energy save in Hobart & Tasmania?

With this figure in mind, estimated annual electricity savings in Hobart and Tasmania total \$1032 - \$1444 when considering a 4 kW - 15kW solar power system. These figures are calculated with a minimum of 50% to 70% solar energy consumption (without batteries).

Which solar energy systems are available in South Hobart?

The most common systems provided by solar energy installers for residential solutions are 5kw, 6kw, 6.6kw and 10kw systems. When installed in South Hobart, these systems can offer an average daily output of 17.5kWh, 18.46kWh, 23.1kWh and 35kWh of power, respectively.

Are solar panels a good investment in Hobart?

Like the rest of Australia, solar power system prices in Hobart have been on a downwards trajectory for several years now, making solar panels an option to consider for anyone living in Tasmania's capital.

Does Tasmania have solar panels?

Tasmania seems unlikely to have an abundance of solar panels, but according to the Clean Energy Regulator, 59,000 solar panel systems are powering homes and heaters around the state. For those Tasmanian households considering installing solar panels, there may be concerns about price, rebates and solar feed-in tariffs.
