

Are solar panels worth it on Long Island?

Yes, solar panels are worth it on Long Island. Based on strong incentives, high utility electricity prices, and a favorable net metering policy, homeowners can expect to save tens of thousands of dollars over the warranted life of a solar system.

Why is Long Island a good place for home solar?

As such, the incentive varies, but the PSEG rewards program can be a great way to reduce the cost of a solar and battery system. The second reason why Long Island is a great place for home solar is because electricity prices are very high, which translates to more solar savings.

Can you go solar on Long Island?

The first incentive that would apply to going solar on Long Island is the NY-Sun Megawatt Block program. This program reduces the upfront cost of going solar based on the size and location of the system. There are three regions: Con Edison, Upstate, and Long Island.

Does Long Island still have solar incentives?

There are three regions: Con Edison, Upstate, and Long Island. Unfortunately, the Long Island region maxed out in 2016 and no longer has incentives. However, while the NY-Sun solar incentive has expired in Long Island, there are still funds remaining for battery storage, which we'll discuss later in this article.

How much solar energy does New York use?

Overall, New York state ranks eighth nationwide in terms of solar energy usage, with just over 870,000 homes powered by solar energy and nearly 5% of the state's electricity powered by solar energy, according to the Solar Energy Industries Association.
