

Is New Hampshire a solar-friendly state?

New Hampshire is certainly not the most solar-friendly state, but there are still some federal and state solar incentives that make going solar more affordable and more appealing. One of the most promising solar incentives is the federal tax credit, commonly called the ITC.

What is the cost of solar energy in New Hampshire?

According to the U.S. Energy Information Administration (EIA), New Hampshire residents pay 30 cents per kilowatt-hour (kWh)--nearly double the national average. Our team spent over 60 hours researching leading solar companies on the national, regional, and local levels.

Who are the best solar installers in New Hampshire?

New Hampshire has 24 solar panel installation companies, according to the Solar Energy Industries Association (SEIA). We've spent hours reviewing each of these providers and believe that SunPower and All Energy Solar are the best options for most customers in your area.

Is New Hampshire a good place to go solar?

Despite those long New England winters, New Hampshire's pricey electric rates and solid net metering programs make it a great place to go solar. Factor in the federal solar tax credit, and New Hampshireites can cut the cost of solar by thousands of dollars, speeding up their payback period and increasing the value of their investment.

Is solar a good investment in New Hampshire?

New Hampshire ranks 41st in the country for solar panel installations, and when residents find out that the average price of solar panels in NH is far higher than the national average on a per-watt basis, many wonder if solar is a worthwhile investment.

Should New Hampshire use more solar energy?

New Hampshire residents pay nearly double the national average for electricity at 30 cents per kilowatt-hour (kWh). Using more solar energy in New Hampshire will help its residents save on these higher-than-average electricity rates, according to the U.S. Energy Information Administration (EIA).
