

Is solar energy a good investment in New Mexico?

New Mexico ranks 19th in the country for solar conversions and solar-friendliness. However, residents pay below the national average for electricity and use much less energy per month than most US homeowners. As such, many New Mexico residents wonder if converting to solar energy is a worthwhile investment.

How much does solar cost in New Mexico?

New Mexico offers some great incentives to help residents save on going solar. After tax credits, the average system is \$13,132 in New Mexico, which is cheaper than in many other states. The national average is \$16,715.

Do solar panels work in New Mexico?

Parts of New Mexico are among the sunniest places on earth, which means solar panels will have no trouble producing lots of energy here. That said, when solar panels get hot, they lose some of their ability to generate power, so choosing a panel with better performance in hot temperatures is important.

Is New Mexico solar-friendly for homeowners?

New Mexico is a solar-friendly state for homeowners that offers several incentives. One of the most appealing financial incentives is the federal solar investment tax credit (ITC), which is a tax incentive in the amount of 30% of your total system expense.

What is New Mexico's solar for all program?

The Energy, Minerals and Natural Resources Department (EMNRD) will administer New Mexico's Solar for All Program, designed to make solar power available to an estimated 20,910 New Mexico households that otherwise might not be able to access this clean, renewable form of energy.

Does New Mexico have a solar investment tax credit?

The federal solar investment tax credit (ITC) is the most significant way to reduce the cost of going solar in New Mexico. If you install a solar panel system by the end of 2032, you will receive a federal income tax credit worth 30% of your system's total cost. The federal solar investment tax credit drops to 26% in 2033 and 22% in 2034.
