

How much solar power does Rhode Island have?

The current solar power generation in Rhode Island is about 42,000 MWh each year, which is only .05% of the state's energy needs--but it could be much greater. If all solar-viable rooftops were to go solar, power generation could increase to between 3,390 MW and 7,340 MW per year--enough electricity, possibly, to power every home in the Ocean State.

Is Rhode Island a good place to install solar panels?

Solar panels require sunlight to produce energy and save you money,so the more sunlight that your roof receives,the more valuable your solar panels will be overall. Rhode Island is considered about averagein terms of available sunlight and an overall good place for solar viability.

Do Rhode Islanders get a solar grant?

As a Rhode Islander, you can participate in either the Renewable Energy Growth (REG) Program or a Renewable Energy Fund (REF) Small Scale Solar Grant (but not both). These are both first-come, first-serve incentives where you can earn \$0.27 per kWh or \$0.65 per watt (up to \$5,000), respectively.

Is Rhode Island good for solar?

Rhode Island is considered about average in terms of available sunlight and an overall good place for solar viability. The state as a whole receives around 202 sunny days per year,compared to the national average of 205. You will also need to assess your home on an individual basis as well.

How much do solar panels cost in Rhode Island?

Solar panels cost a lot to install,but they can save tons of money over time by shrinking or eliminating your electricity bills. The average Rhode Island homeowner needs a 9.54 kW solar panel system to cover their electricity needs,which comes out to \$31,869 before incentives. Prices range from \$27,089 to \$36,649before incentives.

How much can you save with solar power in Rhode Island?

The average Rhode Islander spends around \$130.75 per month on power,which means your potential savings could total \$1,569 per year. The typical resident saves approximately \$34,519 over the lifespan of their solar equipment,and that's after the system pays for itself.
