

How do government incentives drive solar energy adoption?

Government incentives, including tax credits, rebates, and net metering, are instrumental in driving the adoption of solar power among residential homeowners and commercial businesses. Government policies such as RPS, FiTs, and PPAs stimulate demand, encourage investment, and create a stable market for solar energy, accelerating its adoption.

What are solar rebates & incentives?

Rebates and incentives are a crucial way to encourage broader adoption of solar energy and full home electrification across the country. These incentives will typically come from your utility, state government, or the federal government in the form of tax credits, property tax abatements, one-time rebates, or performance-based rebates.

How do solar incentives work?

Lowering the cost of going solar helps more people in your community go solar, which supports clean air, a more resilient energy grid, lower energy prices, and lower fossil fuel emissions. Related: Solar Rebates by State  
The concept of solar incentives is simple: Reduce the cost of solar to make clean energy accessible to more people.

Who can help me apply for solar incentives?

The best way to get current information about solar incentives is to get solar quotes from local installers. They have expertise in working with state and local governments and will be able to assist you in applying for all the incentives you may qualify for.

What is the federal tax credit for solar photovoltaics?

One of the many things this act accomplishes is the expansion of the Federal Tax Credit for Solar Photovoltaics, also known as the Investment Tax Credit (ITC). This credit can be claimed on federal income taxes for a percentage of the cost of a solar photovoltaic (PV) system.

What are the amounts for state solar tax credits?

State solar tax credits vary in amount, usually being a percentage of the total cost of the system. Almost all state tax credits have a maximum, with current amounts between \$500 and \$5,000, depending on the state. They can be claimed in addition to the federal government's investment tax credit.
