

What is the size of the global solar power market?

The global solar power market size was valued at USD 253.69 billion in 2023. It is projected to reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast period.

Does the solar power industry have a strong market share?

The solar power industry shows moderate consolidation, with the top five players commanding significant market share, though numerous smaller players maintain competitive positions in specific market segments or geographical areas.

Which region dominated the solar power industry in 2023?

North America dominated the solar power industry with a market share of 41.30% in 2023. The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast period.

What is a solar power market research report?

A solar power market research report is a qualitative and quantitative in-depth industry analysis of the global market. It details the adoption of solar power systems across several regions and provides a detailed competitive landscape, including information on key players and their strategies.

What are the market trends for solar energy in ISA member countries?

Further, the report captures the market trends covering solar infrastructure and electricity access rates in ISA Member countries. Global investment in renewables reached USD 0.5 Tn in 2022 due to the global rise in solar PV installations. Solar PV dominated investment in 2022, accounting for 64% of the renewable energy investment.

What is the capacity of solar energy in India?

The capacity of solar energy in India peaked at about 63.1.7 GW in 2022. This is a significant increase from the previous year's capacity of about 13.5 GW.
