

Is San Angelo Texas a good place to install solar panels?

With an average of 251 days of sunshine annually, San Angelo, Texas, is an ideal location to install solar panels. Our community can utilize the natural resources of the sun to generate the power needed to run their home or office. We also provide consulting services to help determine if solar panels are right for you.

How much does solar cost in San Angelo TX?

The average price per watt of solar power in San Angelo, TX is \$2.25/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$22,233 for a 14.09 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Do solar installers need a certification?

Certifications aren't necessarily required, but are a great way to weed out lower quality installers. The North American Board of Certified Energy Practitioners (NABCEP) offers an industry-leading certification program, while the PV Installation Professional (PVIP) Board Certification is the gold standard for solar installers.

Does West Texas solar have a solar system?

No matter your needs, West Texas Solar has a system that can work with your power demands and financial budget. Grid-tied, Off-grid or hybrid solutions are all available. Our team of experts can design and install the perfect system for you, your family, and your business.

Should you hire a solar installer?

Solar is a growing industry that attracts contractors from many backgrounds--sometimes only loosely related to solar. But to feel confident in your solar panels, you'll want to work with an installer that has plenty of experience in custom designing systems.

How long does a solar panel installation take?

Compare quotes and sign a contract with a solar installer. Your installer conducts a site visit, either at your house or virtually. Your installer fills out and submits any required permits and documents and orders your equipment. Your solar panel installation takes place over one to three days (on average).
