

Who is Solar System install?

Solar System Install offers expert solar panel installations for homes and businesses. We ensure reliable, cost-effective, and sustainable energy solutions. Trust us for top-quality service and innovative solar technology. Solar maintenance ensures your system runs efficiently and lasts longer.

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

Who are our solar PV installers?

Our solar PV installers are accredited and certified with several organizations, including CHAS, IET, MCS, NICEIC, RECC, ISO 9001, and ISO 14001. They are fully insured and work with high-quality solar PV panel providers like Canadian Solar, JA Solar Panels, Sharp, and Panasonic.

How does a solar installer apply for a permit?

Your solar installer will typically handle the permit application process, which includes: - Building permits : These are necessary to ensure your system meets local zoning and building codes. - Electrical permits : Your installer must ensure that the system is wired correctly and meets electrical safety standards.

What services do you provide after installing a solar system?

Following the installation and activation of your solar system, we provide monitoring services to oversee its performance and guarantee its optimal operation. Our maintenance services encompass routine inspections, cleaning, and necessary repairs to uphold the system's pristine condition. Every property is unique, and so is our approach.

How do I connect my solar system to the grid?

If your solar system is grid-tied, it will need to be connected to the local utility grid. This step involves: - Net metering setup : Many utility companies offer net metering, which allows you to send excess energy back to the grid and receive credits toward your energy bills. Your installer will set up the appropriate meters for this.
