

Do you need a solar insurance policy?

Even though solar insurance products and standardized yet, demand for PV insurance is increasing. In general large PV systems require liability and property insurance, and many developers may opt to add policies such as environmental risk insurance. 1. General Liability Insurance

Are solar panels covered by insurance?

A number of insurers offer solar panel insurance policies, however the premium can be still prohibitively high. To underwrite a fair and comprehensive solar PV policy, underwriters will need to understand the PV technologies and products with lots of field data in order to run through their risk modeling.

What insurance should a solar system owner buy?

Property Risk Insurance The solar system owner usually purchases property insurance to protect against risks not covered by the warranty or to extend the coverage period. The property risk insurance often includes theft and catastrophic risks. 3. Environmental Risk Insurance

What is a solar insurance policy & how does it work?

The policy safeguards revenue losses due to system underperformance for the duration of the revenue contract, which is typically 15 years. The specific coverage terms are negotiated on a project-by-project basis. The policy is brokered by Beecher Carlson, a leading insurance broker and risk management consultant for solar developers.
