

How can a loan make solar more affordable?

An interest-free or low-interest loan makes solar or a battery more affordable because it can be paid off more quickly, potentially using the bill savings it creates. By reducing or removing the upfront cost, a loan allows you to borrow part or all of the cost of your solar system and/or battery.

What is a solar loan?

A solar loan allows you to borrow part or all of the cost of your solar system and/or battery. By reducing or removing the upfront cost, an interest-free or low-interest loan makes solar or a battery more affordable because it can be paid off more quickly, potentially using the bill savings it creates.

How do I go solar without upfront costs?

There are three main ways to go solar without any upfront costs - solar loans, and solar leases or power purchase agreements, also known as PPAs. Solar energy systems are an expensive investment, which is why about 85% of all solar system installations are financed. The zero-down option with the most financial upside is a solar loan.
