

When should a Basic Law be formulated in the field of energy?

A basic law in the field of energy, the Energy Law, should be formulated as soon as possible. Based on this law, the provisions on renewable energy scattered in different laws, administrative rules, departmental regulations and local government regulations can be systematically integrated or cleaned up.

What happens if a state energy authority violates Article 28?

Article 28. Violations of this law by the State Council energy authority, local government energy authorities, and other related authorities in the course of their work in supervising and managing renewable energy development, shall be ordered to be corrected by the relevant authorities of the same or higher level.

What is the legal framework for space-based solar power (SBSP)?

The legal framework for space-based solar power (SBSP) is firmly rooted in principles established in international treaties and customary international law. These principles, universally recognised rules and norms, serve as the bedrock for regulating activities in outer space.

What is a green energy policy?

“It sets clear goals for green energy development and specifies responsibilities of entities involved. It also makes clearer the requirements on various types of renewable energy development including hydropower, wind energy, solar energy, etc,” Wang said.

Who owns solar power?

The ultimate owner of the SRECs owns the “solar-ness” of the power. Many states create SREC markets to spur the development of solar by requiring electricity suppliers to purchase SRECs produced by in-state solar systems as part of their obligation under the state's Renewable Portfolio Standard (RPS).

What are solar interconnection standards & policies?

Solar Interconnection Standards & Policies - Systems that connect to the electric grid are often affected by state and local interconnection standards. Understanding Electricity Market Frameworks & Policies - Understand market structures and how they may impact your project development.
